EDUCATION

University Of Virginia, College of Arts and Sciences **Virginia, U.S.A.**
GPA: 3.77 / 4.00 *Graduate 2027*
Computer Science Major, Cybersecurity Focal Path
Sociology Minor

SKILL SETS

Programming Languages: x86-64/32 Assembly, C, C++, Rust, Java, HTML/CSS, Javascript, Bash, and Python.
Operating Systems: Windows, Linux, and Mac; Highly experienced with Unix shells (sh, bash, zsh).
System & Cloud Infrastructure: SQLite, Tmux, Qemu, Proxmox, Docker, Tailscale, Wireguard, and Wine.
Cybersecurity: Nmap, BurpSuite, OpenPGP, Kismet, Wireshark, Metasploit, Ghidra, SQLmap, OpenVAS, and Splunk.
Artificial Intelligence: Opencode and Ollama; used for automaton on personal server and reverse engineering tasks.

PROFESSIONAL EXPERIENCE

UNIVERSITY OF VIRGINIA | DART CYBERSECURITY LAB **Virginia, U.S.A.**
Undergraduate Researcher, Distinguished Major Candidate *2026 - Present*

- Contribute to the development of a live patching technique using memory injection and control flow redirection.
- Leverage knowledge of low level systems to analyze over 600 CVEs and their respective vulnerable binaries.
- Deliver my research for committee review; graduate with *Highest Distinction* upon publication.

PVCC | INFORMATION TECHNOLOGY **Virginia, U.S.A.**
Assistant Technician *2024 - 2025*

- Analyzed, communicated, and solved technical issues for students and staff.
- Completed data recovery and migration for a variety of devices. Imaged over 500 devices using PxE over IPv4.
- Assisted full time technicians with room checks, classroom hardware/software diagnostics, and computer networking.

EXTRACURRICULAR

COMPUTER AND NETWORK SECURITY CLUB **Virginia, U.S.A.**
President *2025 - Present*

- Network with university faculty and corporate sponsors. Added three new major sponsors during my tenure so far.
- Organize club directives, events, competitions, recruiting, and training for over 50 active members.
- Maintain expansive club server infrastructure: 672 vCPUs, 6 Terabytes of RAM, 2 Petabytes of Storage.

COMPETITIONS

National Collegiate Cyber Defense Competition, 2026
2nd Place, 1st in Injects | Injects Lead, Network Security

Mid-Atlantic Collegiate Cyber Defense Competition, 2026
1st Place | Injects Lead, Network Security

CyberStorm Defense Competition, 2025
2nd Place, 1st in Injects | Team Captain

Collegiate Penetration Testing Competition, 2025
Regional Qualifier | Injects Lead

Injects Lead:

- Consult clients on secure hardware/software implementations and Governance, Risk, and Compliance (GRC).
- Maintain continuous communications with management and delegate tasks to the team based on individual strengths.
- Write professional post-engagement findings documents, implementing sections tailored for various stakeholders, translating complex jargon into clear and direct conclusions.

Network Security:

- Create and deploy custom network-level firewall configurations, fitted for specific enterprise needs and topology.
- Monitor and filter network log activity across multiple subnets using Splunk. Threat-hunt suspected intrusions.
- Identify and defend against AI-based attacks.

PROJECTS

- Built and run a headless Debian server for personal and educational purposes. Host containerized services such as Jellyfin, Nextcloud, and a sandboxed AI agent for research automation. *2022 - Present*
- Deployed a Virtual Private Network service, utilizing a several VPSs and lightweight Wireguard implementations, as a cheaper and more trusted VPN alternative for nearly two dozen client devices. *2023 - 2025*
